Planned activity is also sometimes called 'surveillance', 're-do' or 'follow-up'." ... **"When patients on planned lists are clinically ready for their care to commence and reach the date for their planned appointment, they should either receive that appointment or be transferred to an active waiting list and a waiting time clock should start (and be reported in the relevant waiting time return).** The key principle is that where patients' treatment can be started immediately, then they should start treatment or be added to an active waiting list."*
