

FOI 010

www.bedfordshirehospitals.nhs.uk

First, could you tell me how many Atopic Dermatitis patients have been treated by your trust in the latest four months that you have data available for, and how many of these patients were paediatric versus adult?

Second, for all Atopic Dermatitis patients (adult plus paediatric) treated by your trust in the latest four months, could you please provide the number of patients treated with each of the following:

High Potency topical steroids

Ultraviolet light therapy

Azathioprine

Ciclosporin

Methotrexate

Mycophenolate mofetil

Acitretin

Alitretinoin

Dupilumab

Upadacitinib

Tacrolimus

Pimecrolimus

[The Response for both sites](#)

Unfortunately we use those drugs for lots of conditions and do not keep data that would enable us to extract the information for this indication only.

Kind Regards FOI Team
